NIMBLEBEE

Brand Identity

What we are

A digital systems consultancy for small businesses — bringing clarity, structure, and momentum.

How we feel

Bold and contemporary. Warm and energetic. Confident without being corporate.

Visual metaphor

Chaos becoming order — scattered elements organising into coherent, purposeful systems.

"Ready to go. Built to grow."

BRAND SYSTEM

Logo System

01

The Three Marks

Hexmark

The standalone icon mark. For app icons, favicons, social avatars, and small embossed uses where the name isn't required.

Logomark

The primary brand lockup — hexmark and wordmark combined. Default choice for headers, proposals, and presentations.

Namemark

The wordmark alone. Use when the icon already appears on the page, or in space-constrained horizontal layouts. Minimum 160px wide.

Dark Context

NimbleBee.

Lite Variant

On charcoal backgrounds, dark
photography, dark UI sections

Light Context

NimbleBee.

Dark Variant

On off-white backgrounds, light
UI sections, print materials

Transparent

NimbleBee.

Transparent Variant

For placement on photography or
custom background colours

Usage Rules

Clear Space

Minimum clear zone = height of the hexmark on all sides. No elements of any kind may enter this space.

Do Not

- ✗ Rotate or tilt — hexagons are always pointy-top, vertex at 12 and 6 o'clock
- ✗ Use sharp-cornered hexagons — all hexagons must use rounded vertices (see corner radius rule below)
- ✗ Change the coral hexmark to any other colour — it stays coral on every background
- ✗ Stretch, distort, or change proportions of any mark
- ✗ Use on a busy image or low-contrast surface without a clear zone
- ✗ Use Cormorant Garamond in or near the logo lockup — Poppins only

03

BRAND SYSTEM

Typography

Poppins — The Primary Typeface

Bold 700 Display, CTAs, key data points

SemiBold 600 Section headings, slide titles, brand name

Medium 500 Sub-headings, navigation, UI labels

Regular 400 Body copy, descriptions, captions

Light 300 Long-form copy, supporting text, large pullquotes

The Cormorant Rule

SERVICE OVERVIEW

What we offer

Systems and structure for the businesses that are ready to move fast.

The example above shows correct usage. The Cormorant eyebrow sits above a Poppins heading — the only permitted combination.

Hard Rule — One Use Only

Cormorant Garamond appears **only** as an eyebrow/accent label: Light (300), upright — never italic, 24px, Emerald Mint #10B981, letter-spacing 3–4px, uppercase. Nowhere else. Never in body copy. Never in headings. Never in the logo.

✗ Never do this

Cormorant Garamond set in italic — upright only, always

04

BRAND SYSTEM

Graphic Elements

Class A — Hexagon Motifs

Large background graphic elements · stroke only · always pointy-top · 5–8% opacity in code · 2 colourways: charcoal / off-white

Corner Radius Rule — all hexagon vertices must be rounded. Set corner radius to **12.5% of the circumradius** ($R \div 8$, where R = vertex-to-centre distance). Apply at every scale.

01 Single

One large hexagon
centred in the
composition

02 Corner Crop

Hexagon cropped at
the edge of the frame

03 Loose Cluster

Three hexagons
loosely arranged

04 Aligned Pair

Two hexagons in
horizontal alignment

05 Repeating Field

Tiled hexagonal field
across the section

Class B — Abstract Icons

Small decorative accent elements · transparent background · pointy-top · rounded vertices ($R \div 8$) · 4 colourways each

05

BRAND SYSTEM

Backgrounds & Textures

Background Textures

All assets exported at full opacity — opacity controlled in code. 2 colourways each: charcoal and off-white.

Section Edge Treatments

3 variants · 2 colourways each (charcoal / off-white) · 1440×120px · used at section transitions

01 Diagonal Cut

Sharp angled transition between sections.
Bold and energetic.

02 Gentle Curve

Soft curved edge. Warm and
approachable — ideal for content
transitions.

03 Stepped Offset

Staggered rectangular steps. Structural
and distinctive — echoes the grid
metaphor.

BRAND SYSTEM

Digital Specifications

Logo Sizes & Usage Contexts

Minimum Sizes

Logomark	200px wide
Namemark	160px wide
Hexmark	32px
Favicon (Hexmark)	32×32px · 16×16px
Social Avatar (Hexmark)	min 200×200px

Which Variant When

- Dark / charcoal background → use **Lite variant**
- Light / off-white background → use **Dark variant**
- Photography / custom colour → use **Transparent variant**
- Social profile / favicon → Hexmark on charcoal background
